Mr. Wall:

The file on Oswald - sterile version -
is in Randall's office. He is going to
show our final product to SE, LA &
Asst. Sec. for their approval. We
gave him the lists of denied
documents, but he discovered we
needed to add more FOIA exemption
codes to the list. This will take a
little time - will get the lists back
to him next week. The Dep. Director
plan to meet next Thursday to
decide how to release the file.

Points to check.

- * 1. First vol. refers to TS Doe 167906. It brings out the point. Do we have all TS files. Should follow up.
- 2. Query Vaughn on need to protect people in terms of Privacy (PT) - Owner of car observed in front of Cuban Emb. See Dir 85221^{27 Nov} See DIR 85391 of 27 Nov 63 10/27/1930

Points for C/S

10/27

1. Have set aside a Mex Station set page log/abstract of their traffic on basis if it is duplicative. Key may be if passed to Warren Commission. It is in M.R.

V says no. 2. State traffic passed from Aust. to Mex to Sec State in cipher and without info on tel tap. For his say, not sure State is being asked for Oswald material & in any event their people under same injunction as we are. DTR 85573 27 Nov 63

V says can check with Bureau Tars. 3. Bureau got a lot of tel tap info from Mexico there and one thinks may be blown from that direction.

4. Would like to confirm we not pass the M.R. to the Senate. Reason being it makes it too easy for them to check our completeness.

5. Question arises re Lee Wiggin's info in file on Warren Com. report. They not classified. If left in on basis they show what points we checked in final W.C. report.

6. Sen B. raised point of Rosenberg's complaints about not getting all the material. I said although he not a source we should leave it in as it shows our integrity.

7. UFGA-13059, 13 Dec 63 Vol 10 referable

a taped conversation of Oswald in New Orleans which is in file.

8. Query c/cr on P^3 of DIR 85654 of 28 Nov 63 in Vol III. See page 143 on Tab.
